PROFESSIONAL SUMMARY

Full-Stack AI Engineer building agentic AI systems, multi-provider RAG pipelines, REST APIs, computer vision models, and production-ready AI workflows. Experienced with LangGraph, CrewAI, MCP servers, LLM orchestration, vector databases, deep learning, dataset creation, SQL/NoSQL databases, and CI/CD practices. Strong focus on end-to-end AI product delivery from architecture and backend development to model integration, testing, and deployment.

TECHNICAL SKILLS

AI / GenAI: LLMs, Agentic AI, AI Agents, RAG, Prompt Engineering, Fine-Tuning, Hugging Face Transformers
Agentic Systems: Multi-Agent Workflows, LangGraph, CrewAI, MCP Server Development, OpenClaw, Tool Orchestration
Deep Learning / CV: PyTorch, TensorFlow, Keras, ANN, CNN, RNN, YOLOv11, OpenCV, MediaPipe
Backend / APIs: FastAPI, Flask, REST APIs, CRUD APIs, API Integration, Backend Architecture
Databases / Data: PostgreSQL, MongoDB, SQLite, SQL, NoSQL, FAISS, Vector Databases, Pandas, NumPy, Web Scraping
DevOps / Tools: Git, GitHub Actions, pytest, mypy, Pylint, Bandit, Jupyter Notebook, Google Colab, VS Code

PROFESSIONAL EXPERIENCE

Techozon Software House

Islamabad, Pakistan

Jr. AI Engineer

Mar 2026 – Present

- Build end-to-end AI applications involving LLMs, agentic workflows, backend APIs, database integration, and production-oriented deployment workflows.
- Design multi-agent systems using LangGraph, CrewAI, MCP server integrations, tool orchestration, and layered agentic AI architecture.
- Develop REST APIs including GET, POST, PUT, PATCH, and DELETE endpoints for AI-powered platforms and internal automation systems.
- Work with PostgreSQL, MongoDB, SQLite, FAISS, and vector databases for structured storage, retrieval, and RAG-based AI applications.
- Create and preprocess datasets for computer vision projects, model training, evaluation, and inference integration.

Techozon Software House

AI Engineer Intern

Jan 2026 – Feb 2026

- Worked on LLM applications, RAG concepts, machine learning scripts, computer vision workflows, and generative AI prototypes.
- Applied OpenCV, YOLOv11, TensorFlow, Keras, and Python tools to practical AI and computer vision tasks.
- Assisted in dataset preparation, preprocessing, model evaluation, and backend integration for AI projects.

Habib Rafiq Pvt. Ltd.

Assistant Store Manager

Mar 2021 – Aug 2023

- Managed daily operations, supervised staff, coordinated reporting, and improved workflow efficiency in a fast-paced environment.

PROJECTS

Easy-Study – Multi-Model RAG Study Assistant | *FastAPI, LangChain, FAISS, LLMs*

GitHub

- Built a full-stack RAG assistant that ingests PDFs, YouTube transcripts, web content, and notes for AI-powered study support.
- Implemented chunking, Hugging Face embeddings, FAISS vector search, semantic retrieval, and LLM-based answer generation.
- Integrated multiple LLM providers including Gemini, OpenRouter, Ollama, and OpenAI with runtime model switching and fallback logic.
- Added CI/CD quality checks using GitHub Actions, pytest, mypy, Pylint, and Bandit.

Smart Garbage Detection System | *YOLOv11, OpenCV, Flask, SQLite*

GitHub

- Developed a computer vision system for waste detection and classification using YOLOv11 and OpenCV.
- Created and prepared datasets for model training, evaluation, and inference workflows.
- Integrated detection results with a backend dashboard for real-time monitoring and analytics.

AI Products Description Generator | *Python, LLMs, Prompt Engineering*

GitHub

- Built an AI-powered content generation system for structured product descriptions using LLM prompting workflows.

Fruit Classification System | *TensorFlow, Keras, CNN*

GitHub

- Created a CNN image classification pipeline covering dataset preprocessing, training, validation, and evaluation.

EDUCATION

University of Azad Jammu & Kashmir

Pakistan

Bachelor of Science in Artificial Intelligence

2021 – 2025
